

How much do
you think your drop
drop of water
weighs?

Is your water
drop clear or milky?

Can you see
through your water
drop?

Does your water
drop make the lines
on your hand look
bigger or smaller?

Does your water drop move slowly or quickly when you tilt your hand?

Is your water drop getting smaller or larger?

How long do you think you can hold your water drop?

After a long time, what do you think will happen to your water drop?
